

SUMIT HATEKAR

Full Stack Developer

Pune, India · sumithatekar9@gmail.com · +91 7387155502 · github.com/sumit1456 · linkedin.com/in/sumit-hatekar123

Profile Summary

Full Stack Developer with experience building performance-focused web applications and document editing systems. Strong background in Java, JavaScript, and modern frontend frameworks, with hands-on experience in WebGL rendering and backend-driven PDF processing pipelines. Focused on layout accuracy, data transformation, and maintainable system design.

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL, HTML5, CSS3

Backend & APIs: RESTful APIs, Authentication & Authorization (RBAC), DTO Mapping, Validation, Error Handling, Pagination, API Security Basics

Frameworks & Libraries: Spring Boot, Spring Security (JWT basics), React, Redux, PixiJS (WebGL)

Databases: PostgreSQL, MySQL, Oracle SQL, Hibernate, Spring Data JPA

PDF & Graphics: Apache PDF, jsPDF, PyMuPDF, Canvas API, Coordinate Systems, Bounding Boxes, Layout Engines

Tools: Git, GitHub, Docker, Maven, Postman, AWS, Netlify, Render

Experience

Full Stack Developer — Freelance / Client Project (Education Domain) *2025 – Present*

- Developed an end-to-end Exam Management System (MRB Exam Management) based on academic requirements.
- Designed modules for exam creation, student management, hall ticket generation, and result processing.
- Built frontend interfaces using React and backend APIs using Spring Boot for secure data handling.

Projects

ResumeMaker Pro — GPU-Accelerated Resume Editor [\[Link\]](#) *Sep 2025 – Dec 2025*

React, PixiJS (WebGL), Spring Boot, Java (Apache PDF), jsPDF

- Built a browser-based resume editor using React and PixiJS to render layout guides and graphical elements.
- Used a hybrid rendering approach combining WebGL graphics with DOM-based text to preserve ATS compatibility.
- Implemented a Spring Boot backend for PDF generation using a Java PDF library.
- Ensured exported PDFs remain searchable and visually consistent across different viewers.

PDF Editor App — JSON-Based PDF Reconstruction [\[Link\]](#) *Dec 2025 – Present*

Python, FastAPI, PyMuPDF, React

- Built a PDF processing backend using FastAPI and PyMuPDF to extract structured JSON from documents.
- Regenerated PDFs from extracted JSON while preserving approximately 90–100% visual layout fidelity.
- Replaced system and embedded fonts with Google Fonts during PDF regeneration.
- Maintained consistent coordinate mapping between extracted data and regenerated output.

DOM-WebGL Rendering Engine [\[Link\]](#) *Nov 2025 – Present*

PixiJS (WebGL), Web Workers, Canvas API

- Developed a custom WebGL rendering engine for layout primitives, bounding boxes, and vector shapes.
- Rendered complex scenes with 2,600+ scene-graph nodes per page while maintaining smooth interaction.
- Implemented coordinate normalization and scene-graph management for accurate transformations.

Education

Master of Science in Computer Applications *2025 – 2027 (Expected)*

Savitribai Phule Pune University — First Semester: 89.63%

Bachelor of Science in Chemistry *2021 – 2024*

Shivaji University — 65%

Higher Secondary Certificate *2019 – 2021*

Yashwantrao Chavan Institute of Science, Satara — 84%

Secondary School Certificate *2018 – 2019*

The Modern English School, Koregaon — 87%

Certifications

Java Full Stack Development — QSpiders Wakad (2024)
